

MAXIMIZE YOUR TIME AND ADD VALUE

Implement Technologies Efficiently and Effectively

If not implemented correctly, new technologies can introduce additional risk and complexity to your organization. Optiv's Implementation services allow you to fully maximize your product investment with a carefully planned, well-executed deployment from highly trained technology consultants. We take the burden off of your busy staff, allowing them to focus on other initiatives. With knowledge transfer and training post-deployment, your team is better equipped to manage your new technology moving forward. With Optiv by your side, you gain a streamlined implementation on time, within budget and without the worry.

Optiv Provides Implementation Services in the Following Technology Areas:			
 Application and Data Solutions	 Endpoint Solutions	 Network and Mobility Solutions	 Situational Awareness (SIEM)
<ul style="list-style-type: none"> • Application Performance • Compliance • DLP • Database Protection • Web Application Firewalls • Web and Email Security 	<ul style="list-style-type: none"> • Advanced Malware • Application Control • Encryption • Endpoint Suites • Host IPS 	<ul style="list-style-type: none"> • Firewall • Network • IPS/IDS Network • MDM/MAM • Wireless 	<ul style="list-style-type: none"> • SIEM Solutions

How Do We Do It?

PLANNING:

Optiv's consulting team reviews the scope of the project with you to make sure it meets your objectives and expectations. The scope includes the product(s) to be implemented or migrated, all the necessary rule sets and configurations and the timeline.

CONFIGURATION:

Whether your team is implementing brand new products or migrating from an old platform, Optiv implements your changes into one environment based on agreed upon parameters from the planning and design process.

DEPLOYMENT:

Our team double checks their work for accuracy and modifies configurations as needed. Once the environment is tested, we put your cutover plan in place to route traffic to the newly implemented product. Our experts then provide post-cutover testing and troubleshooting.

CLOSING:

At the end of the project, Optiv holds a knowledge transfer session with your team to provide information about using and maintaining the system as well as documentation around configurations, findings and recommendations.

Benefits of Optiv's Implementation Service

Minimized Risk Associated with Complex Implementations:

With extensive product expertise, we take the risk out of deploying new technologies or migrating from legacy platforms.

Leverage Leading Practices from the Beginning:

Gain the upper-hand with industry best practices from day one.

Increase the Effectiveness of Your Team:

Project documentation and knowledge transfer help create product authorities within your own team.

Get it Right the First Time:

Reduce the risks from improperly tuned and configured technology. Make sure that products are working as you expect.

Optiv provides Implementation services for solutions from the following partners:
