

# Enhance Your RSA Archer® Platform with Optiv GRC Services

## Get the Most Out of Your Technology Investment and Reduce Enterprise Risk

Too often, board-level leadership lacks visibility into finding and remediating the risks its organization faces. When companies need a solution that provides an enterprise view of risk, they most often look to a tool for assistance. Working with hundreds of clients, Optiv experts can attest that although purchasing a governance, risk and compliance (GRC) tool is beneficial, without a larger risk program strategy, the tool alone will drive less business value. A tailored framework and strategic roadmap that includes people, process and a technology like RSA Archer is vital to the success of a GRC program.

Together, Optiv and RSA Archer can assist your organization holistically, from establishing a governance framework to building and maturing your respective GRC programs with a technology that can scale with that plan. Additionally, Optiv GRC services help ensure a timely and effective deployment of RSA Archer across the enterprise and can better enable you to transform risk and compliance efforts into a competitive advantage.

### How Do We Do It?

- PLAN**

Optiv works with key business stakeholders to define objectives that align with the people, processes and tools for GRC requirements.
- DESIGN**

We partner with your organization to architect and design the optimal GRC solution for your organization – including technology selection and deployment strategies.
- CONFIGURE**

Following program design, Optiv implements, integrates and tests the defined GRC solutions within your environment.
- DEPLOY**

Optiv helps ensure program alignment and solutions roll out. We then train and transfer knowledge to your staff for effective sustainability.
- SUPPORT**

We provide post-implementation support, including enhancements and optimization, updates and expert-on-demand services.

## Benefits of Optiv and RSA Archer:

**Proven Methodologies for Risk Security Strategy** - Optiv and RSA Archer are both pure-play security providers that bring the right combination of people, process and technology to our clients.

**Comprehensive GRC Program Development** - Using Optiv's strategic offerings to develop your risk program goals and requirements, prior to RSA Archer deployment, has proven long-term success.

**Tactical and Coordinated Deployment** - Optiv helps clients configure, customize and deploy their RSA Archer technology to enable automation and alignment to business needs.

**Ongoing Expert Support** - Optiv's layered support model provides ongoing technical support. Additionally, we can train your users through hands-on education and knowledge transfer in order to boost program success.

## The Optiv Advantage:

Optiv can help businesses in every industry connect information security policies, procedures and practices with business goals. Our security leadership experts, backed by our team of consultants, can provide the experience you need to take your program to the next level.

### Expert Minds
