

## SERVICE BRIEF

# Cyber Digital Transformation: Cloud Threat Monitoring and Compliance as-a-Service

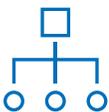

Harden security with continuous adaptive risk and threat analysis of your multi-cloud environments

Cloud services provide the speed and agility necessary for the enterprise to transform business. On the flip side, the dynamic and intangible nature of cloud is challenging businesses to maintain full visibility of critical assets and effectively counter risks.

Even when deployed securely in cloud environments, the ongoing maintenance required to harden security is complicated by continual modifications to cloud configurations. Fragmented ownership by individual lines of business, multiple regions and a variety of service providers – coupled with ineffective integrations – result in failure to meet compliance and increases security risk.

Optiv Security's Cloud Threat Monitoring and Compliance as-a-Service applies continuous adaptive risk and threat analysis to multi-cloud environments. We augment your threat monitoring capabilities and help enable compliance through a context-dependent set of micro security decisions that continually protect your business from evolving risks on a 24/7 basis. Our cybersecurity experts contain and manage vulnerabilities in near real-time so your business is protected – even as cloud services multiply and change at a rapid pace. The result is a more dynamic and stronger security posture to help you better protect your business.

## How Do We Do It?

### IMPLEMENT

Cloud threat monitoring and compliance platform configured to maintain client-owned public cloud environment

### OPERATE

Continuously onboard new data sources, accounts, rule sets, reporting requirements and additional public cloud assets, as needed

### MAINTAIN

Ensure no configuration drift occurs as upgrades are made

### MONITOR

Continuous 24/7 monitoring for configuration issues, outdated agents, policy and general security gaps

## How We Do It Better

- Continuous 24/7 adaptive risk analysis of multi-cloud environments to help organizations create more **dynamic and stronger security postures**.
- **Maintain a secure and hardened** cloud environment by eliminating configuration drift
- **Quickly achieve business outcomes and value** through simplified deployment, integration, management and operation of your threat monitoring platform
- Contain and manage vulnerabilities **in near real-time**, even as cloud services multiply and change at a rapid pace

## The Optiv Advantage

The Optiv Advantage: Optiv helps businesses in every industry connect information security policies, procedures and practices with business goals. Our security leadership experts, backed by our team of consultants, can provide the experience you need to take your program to the next level.

### EXPERT MINDS

Optiv's security professionals are dedicated to helping you achieve results and realize value. Our team of 1,000+ highly skilled client managers and security practitioners work hard to deliver superior results and cutting-edge research to solve your complex, real-world security problems.

### LEADING BEST PRACTICES

Our knowledge of leading best practices helps Optiv formulate security recommendations tailored to meet your specific business objectives.

### CLIENT-FIRST CULTURE

Optiv's passion for security and our commitment to quality results means we focus on the right solutions to meet your specific needs.

### PROVEN METHODOLOGIES

Optiv has developed proven methodologies to help ensure superior outcomes for your projects and programs.
