

# Optimize Your CylancePROTECT® Investment with ThreatZERO™ Services

Accelerate time to prevention from cyber threats and improve ROI

When enterprises initially deploy CylancePROTECT, active threats or evidence of previously unknown compromises are commonly found in the environment. Legacy antivirus solutions have left the enterprise vulnerable to numerous malware attacks that would require an overwhelming amount of resources to remediate and move into auto-quarantine. As a result, enterprises have to contend with overly complex security solutions that are not preventing attacks as expected and risk the loss of company assets.

This is where Optiv can help through delivery of Cylance ThreatZERO Services. **Optiv experts are trained and certified by Cylance to help organizations overcome challenges like partial installations, improper configurations, internal resource constraints, lack of training, and the inability to optimize security.** ThreatZERO Services expedite the implementation of CylancePROTECT, mitigate any risks that are identified, and facilitate immediate ROI, bringing clients to a state of prevention.

## How Do We Do It?

ThreatZERO Services are delivered through a series of phases in consultation with the client during weekly meetings. **Meetings are led by an Engagement Manager and Optiv ThreatZERO expert and include the following:**

Agent is installed into the environment in default mode (alert only, no auto-quarantine).

All systems report back information to the console, then customized tools and processes are used to identify what files need to be safe-listed or quarantined.

Once all potential threats have been reviewed and convicted, the systems will be moved into auto-quarantine.

Once full Memory Alert and Script Control Alerts have been reviewed, the next prepared policy is a block or terminate mode.

Once all systems are at the most secure policy, a comprehensive ThreatZERO Report will be run and a closeout meeting will be scheduled.

# Benefits of Optiv+Cylance ThreatZERO Services

## Eliminate Organizational Drag

ThreatZERO experts facilitate complete installation and configuration of CylancePROTECT so your team can focus on business priorities and reduce bottlenecks from system downtime.

## Enhance Protection

Throughout our engagement, we identify and remediate all potentially unwanted programs (PUPs) and malware, resulting in proper classification of alerts to prevent alert fatigue.

## Augment Skillsets

We provide antivirus, malware and solution expertise training to your team to maintain prevention status and respond to threats using best practices. Moreover, Optiv brings additional value with our depth of expertise and knowledge in the endpoint security space.

## Maximize Return on Investment

By optimizing and operationalizing CylancePROTECT through ThreatZERO services, you increase efficiency in your environment and get faster time to maximized ROI while accelerating the attainment of prevention status.

## The Optiv Advantage

Optiv can help businesses in every industry connect information security policies, procedures and practices with business goals. Our security leadership experts, backed by our team of consultants, can provide the experience you need to take your program to the next level.

### Expert Minds

Optiv's security professionals are dedicated to helping you achieve results and realize value. Our team of 1,000+ highly skilled client managers and security practitioners work hard to deliver superior results and cutting-edge research to solve your complex, real-world security problems.

### Leading Best Practices

Our knowledge of leading best practices helps Optiv formulate security recommendations tailored to meet your specific business objectives.

### Client-First Culture

Optiv's passion for security and our commitment to quality results means we focus on the right solutions to meet your specific needs.

### Proven Methodologies

Optiv has developed proven methodologies to help ensure superior outcomes for your projects and programs.

*Optiv is a market-leading provider of end-to-end cyber security solutions. We help clients plan, build and run successful cyber security programs that achieve business objectives through our depth and breadth of cyber security offerings, extensive capabilities and proven expertise in cyber security strategy, managed security services, incident response, risk and compliance, security consulting, training and support, integration and architecture services, and security technology. Optiv maintains premium partnerships with more than 350 of the leading security technology manufacturers.
