

Managing Success

Activating projects from start to finish

Optiv's project management consulting services have an impressive track record of providing our clients with proven solutions that are both effective and cost-efficient. Our security centric, PMP certified project managers are accountable for the successful execution of your security projects. Delivering over 3,000 security engagements each year, we lead tactical execution, provide strategic insights and ensure our solutions meet the desired results with minimal disruption to your organization. Optiv's overall technical expertise, backed by the project management office, aids successful delivery of solutions, on time and on budget. We offer a variety of project management services tailored to your organizational needs.

MARKET PROBLEMS, OPTIV SOLUTIONS

- **Project Complexity** – Our project managers align to Optiv services to integrate into your team, allowing for full visibility into project execution along with quick escalation if needed.
- **High Risk Projects** – By nature, technology implementation is risk filled. Our project managers are best positioned to assist by identifying, analyzing and responding to risk factors throughout the project.
- **Lack of Expertise** – The combined expertise of Optiv is unmatched in the industry. Our project managers have an area pool of industry leading experts to tap into throughout the execution of your project and beyond.

KEY FACTS

- › **Organizations say the most important indicator for success of a project is on time delivery, followed by the project being within budget.***
- › **81 percent of organizations that actively sponsor project management perform successfully in project execution.****
