Risk Advisory Services: Security Strategy Assessment
Your roadmap to a business-aligned, threat-aware security program.

As fast as business initiatives evolve, the threat environment is evolving even faster. Optiv’s Security Strategy Assessment helps you stay ahead of the curve by gauging your security program’s effectiveness against big-picture corporate initiatives. We assess current policies, identify threats, expose gaps and help you prioritize security objectives.

Not only do you gain a clearer understanding of how your current program maps to the realities of your business, but you have the tools you need to clearly—and persuasively—articulate your vision. Most importantly, your assessment results in an actionable roadmap you can use to plan, build and run a threat-aware and business-aligned security program.

Processes That Elevate Your Security Game

- Align Security Initiatives with Business Goals
  Interview key business stakeholders to gain insights into the products and services that generate revenue.

- Document Your Business-Relevant Threats
  Determine specific threats to your organization. Identify requirements to improve your defense and response posture.

- Map Controls in Place to Protect Your Business
  Examine current security program structure and maturity. As a result, create an actionable and prioritized program roadmap.

- Build a Business-Aligned Security Program
  Review key findings and results during a facilitated discussion. Receive a boardroom-ready presentation to share with key stakeholders.

Optiv’s SSA helps mature security programs from foundational awareness to strategic in nature.

The goal?
To develop a security strategy that aligns data protection needs with business strategy. Whether you’re in the early planning stages or managing a well-established security program, you’ll gain in-depth knowledge of both the opportunities and the threats challenging your organization.
The Optiv Advantage

---

**Service Options**

**LIGHT**
Are you just getting started in your security journey or need a refresh of an existing strategy or roadmap? We review a subset of controls and capabilities, identify priorities, and help you establish a program baseline.

**FOCUSED**
Do you have prior findings and recommendations that haven’t been prioritized or implemented. Focused engagements target specific areas such as Program Design and Governance, Incident/Breach Response, Privacy Program, and Security Architecture. We work with you to set priorities and optimize the balance of people, process and technology in your security program.

**FULL**
If you are concerned with the overall alignment, coverage and defensibility of your security strategy, this is the level for you. We conduct an enterprise-wide review of your entire security program to give you the ability to validate and articulate the organization’s security strategy vision. This is ideal for anyone responsible for the governance of an organization’s security risk strategy.
