Cybersecurity Education Services

eLearning and Simulated Phishing

Recent high-profile incidents underscore the need for security awareness training. In a world where your employees are frequently exposed to sophisticated attacks, users are often the first link in the security chain. By training and testing your employees, you can simulate and reinforce proper security-aware behaviors to your entire organization.

Our engaging programs are designed to help you meet compliance requirements, minimize risks and maximize data security.

The Optiv Advantage

Optiv helps clients plan, build and run cybersecurity training programs that:
• Align with business objectives
• Resonate with company culture
• Alleviate strain on internal resources
• Enable continuous learning and development

How We Do It

• Basic Tier (Simulated Phishing)
• Core Tier (68 General End User Awareness Courses)
• Total Tier (Core Content + Role-Based Courses)
• Advanced Tier (Total Content + Developer Courses)

Simulated Phishing and Learning Management System (LMS) Platform

• Create and deploy real-world simulations
• Evaluate end user behavior
• Address potentially risky behaviors with just-in-time training
• Access to more than 400 pre-built phishing emails, landing pages and training pages

Optiv Solutions

Optiv’s Cybersecurity Education Services provide clients with the means to specifically target the human behavior aspect of risk that could damage or disrupt your core business.

TYPES OF ELEARNING:
• General End User Awareness
• Just-in-Time Videos
• Role-Based Courses
• Compliance Courses
• Developer Courses

With Optiv’s Cybersecurity Education Services, clients can expand their security program capabilities, allowing for a scalable and repeatable method of minimizing the human risk to your business. Components of the service can be customized with company-specific policies and procedures as well as scaled to include translations for a global audience.
Optiv is a security solutions integrator – a “one-stop” trusted partner with a singular focus on cybersecurity. Our end-to-end cybersecurity capabilities span risk management and transformation, cyber digital transformation, threat management, cyber operations, identity and data management, and integration and innovation, helping organizations realize stronger, simpler and more cost-efficient cybersecurity programs that support business requirements and outcomes. At Optiv, we are leading a completely new approach to cybersecurity that enables clients to innovate their consumption models, integrate infrastructure and technology to maximize value, achieve measurable outcomes, and realize complete solutions and business alignment.
