Cybersecurity Education and Instructor-Led Training

Up-level your staff through a holistic approach to people, processes and technologies

There are more cybersecurity technologies available than ever, and organizations are deploying an increasing number of them. The average enterprise environment has 75 security tools.¹ According to Optiv research, organizations only properly leverage 40% of these security tool investments, with over 25% of investments considered shelfware.² And, 44% of companies state that increasing security awareness programs and staff training are top priorities this year. This demonstrates that needs are shifting towards industry standards and best practice workshops, in addition to pure technology training.³ Optiv works with clients to design training programs tailored to individual and/or group needs.

Learn from dedicated Optiv instructors and an international network of over 2,500 trusted training partners.

ROLE-BASED TRAINING
Receive training specific to roles within an organization: developers, security team, credit card handlers, executives and more.

TRAINING APPLICATION
Enable end users to practice and apply their knowledge in a safe environment.

GENERAL END USER AWARENESS
Educate end users on security awareness topics to strengthen an organization’s overall defenses.

AUTHORIZED TRAINING CENTER FOR:
• Palo Alto Networks
• Symantec (ProxySG)
• Check Point
• F5 Networks
• LogRhythm
