Security Operations

Effective Detection, Rapid Response, Containment and Remediation of Security Threats

Organizations are making significant investments in technology and people to defend against cyber threats. However, many security leaders still express frustration in their security posture and worry about risk of exposure and their ability to respond to threats. Our clients want to mature and optimize their security operations while gaining confidence that the business is protected.

Optiv’s Managed Detection and Response (MDR) delivers 24x7x365 threat monitoring, detection and response services to customers leveraging a combination of technologies, advanced analytics, hunting, threat intelligence and human expertise in incident investigation and response.

MDR Solutions

- Multi-Disciplinary SOC Team
- Continuous Detection and Response
- ThreatDNA™ Platform
- Threat Intelligence
- Data-Driven Analytics and Enrichment
- Client Portal for Metrics and Dashboards
- Threat Hunting
- Built on Best-of-Breed Technologies
- Ongoing Tuning of Solution Based on Threat Intelligence
- Personalized Onboarding, Guidance and Support
