Insider Risk Management
Enabling Your Company to Identify and Mitigate Insider Risks Proactively

Understanding the complexities and nuances of a successful Insider Risk Program can feel overwhelming. Many organizations focus on tactical or tool-oriented insider risk initiatives, missing the larger program aspects. Trends in rising threats, including those created by an increasingly remote workforce, phishing and social engineering attacks, and a reactive focus leave organizations feeling unprepared to identify and protect against insider risks.

Optiv Solutions
At Optiv, we think about insider risk holistically. More than a tool, our methodology focuses on proactively mitigating insider incidents, identifying risks before they happen and controlling the damage these threats can do to your organization. This means your organization is educated, prepared and enabled to identify and respond quickly and effectively.

Optiv’s Insider Risk Management Framework allows organizations to:

- **Govern** your Insider Risk Program and strategy
- **Protect** your data, assets and people
- **Detect** anomalous or risky behavior
- **Respond** quickly and effectively to potential incidents and investigations
- **Recover** and implement continuous improvement in people, process and technology controls and initiatives
- **Advise** and strategize an approach that works for your business, developing an Insider Risk Strategy that is effective and efficient
- **Deploy** policies, processes and a technology stack to support insider risk initiatives and use cases successfully
- **Operate** and continuously monitor the information and physical security boundaries designed to protect your data, your assets and your people
Optiv’s insider risk team enables you to create and manage a successful Insider Risk Program. We can help you:

- **Define** your Insider Risk Program’s mission and objectives
- **Correlate anomalous behavior** across physical and logical data sets to indicate potential risk or threats
- **Understand your critical assets**, including infrastructure, data, intellectual property and people
- **Govern, protect, detect, respond to and recover from** insider incidents
- **Align your program** to how you do business
- **Recognize the intrinsic value** your workforce provides
