SERVICE BRIEF

Risk Transformation Service
Get off the Assessment Conveyor Belt

Assessments and gap analyses are consistently used to verify compliance with required regulations and baseline frameworks. Once the results are provided though, gaps are not closed and the same issues show up year after year. Why? Results of assessments and analyses typically only tell you what you need to do, yet hardly any tell you how to do it. For smaller organizations or federal agencies, simply understanding their risk profile can be a challenge that leads to limited risk visibility and an unclear threat landscape.

Execution of risk reduction, strategy or remediation requires communication, planning, buy-in throughout the organization or federal agency, inter-dependency mapping and a way to demonstrate results. And while these activities are not new to the world, most organizations and federal agencies do not have the people or time to effectively execute, resulting in lack of progress over time.

Regardless of your organization or federal agency’s size, Optiv’s Risk Transformation Service provides a way to act on assessment findings or operational goals to build sustainable risk reduction and security programs. Our service takes findings from assessments, strategic plans or desired improvements and helps you build out a sustainable risk reduction program that promotes success, aligns your risk program with business or agency initiatives, and clearly articulates your security posture to executive teams and boards of directors.

How Do We Do It?

ALIGNMENT
Transformation alignment with requirements and prioritized risk functions that increases insight among business or federal agency management.

MANAGEMENT
Project management, control validation, and risk and measurement dashboards.

DESIGN
Planning and architecture development, initiative by initiative.

SUSTAINABILITY
Sustainable transition and iterative feedback with mitigation validation, repeatable processes, playbooks and more.

EXECUTION
Development of an integrated execution plan that considers timelines, constraints, threat modeling and more.
The Optiv Advantage

The Optiv Advantage: Optiv helps businesses in every industry and federal agencies connect information security policies, procedures and practices with organizational or agency goals. Our security leadership experts, backed by our team of consultants, can provide the experience you need to take your program to the next level.

EXPERT MINDS
Optiv’s security professionals are dedicated to helping you achieve results and realize value. Our team of 1,000+ highly skilled client managers and security practitioners work hard to deliver superior results and cutting-edge research to solve your complex, real-world security problems.

LEADING BEST PRACTICES
Our knowledge of leading best practices helps Optiv formulate security recommendations tailored to meet your specific business or agency objectives.

CLIENT-FIRST CULTURE
Optiv’s passion for security and our commitment to quality results means we focus on the right solutions to meet your specific needs.

PROVEN METHODOLOGIES
Optiv has developed proven methodologies to help ensure superior outcomes for your projects and programs.

Get Started with Cyber Program Development

If you’re not sure where to begin, Optiv can help jump start the process with a Cyber Program Development engagement. Focused engagements are designed to target a limited number of areas of a cyber program and can include, but are not limited to:

- Risk Management
- Privacy Management
- Compliance Management
- Vulnerability Management
- Cyber Governance and Board-Level Reporting
- Enterprise Security Architecture
- Insider Threat and Risk
- Cybersecurity Management
- Business Continuity and Disaster Recovery

Enterprise-level Cyber Program Development engagements are also available if you would like a comprehensive plan to reduce cyber risk across all areas of the organization or federal agency.
