Optimization Services
Maximize Your Technology Investments

A large portion of many organizations’ budgets goes to procuring the technologies needed to protect assets and meet compliance requirements. To best meet these goals, implemented technologies need to be utilized to their full capacity. Often products are deployed to replace old and end-of-life technologies, or to meet compliance requirements with very little thought or effort given to maximizing the value of these newer, more sophisticated products. How do you know if the technologies you put in place are working efficiently and protecting your systems as you hoped? Even more pressing – are you current on the latest updates, configurations and processes that keep your technology relevant?

Optiv Solutions

Optiv’s Optimization services help you best utilize your security technologies and features as well as the networks and systems they were acquired to protect. We can help reduce the cost of investment as you effectively adopt, manage and scale technologies and applications in today’s highly evolved threat landscape. We provide the technical leadership, professional services expertise, tools and best practices to help you intelligently run your security infrastructure for optimal performance.

How Do We Do It?

Optiv’s Optimization services provide the knowledge and expertise to address your security needs, compliance requirements and business objectives. Our services include five phases:

- **PLANNING**
  Optiv consultants conduct a pre-project call to learn about business goals and requirements.

- **REVIEW AND ANALYSIS**
  We review existing documentation, current infrastructure and security requirements to determine the course of action.

- **OPTIMIZATION AND REMEDIATION**
  Optimized configurations and settings are put in place based on vendor, industry and Optiv best practices. This could include addition of new policies, rules and configurations.

- **DOCUMENTATION**
  Summary of gathered information, identified gaps, associated recommendations, changes made, applied methodologies, high-level findings and final configurations.

- **NEXT STEPS**
  Consider routine Health Checks and Optimizations to keep your systems operating at maximum efficiency and relevancy.

### Optiv provides Optimization services in the following technology areas:

The Optiv Advantage

Optiv can help businesses in every industry connect information security policies, procedures and practices with business goals. Our security leadership experts, backed by our team of consultants, can provide the experience you need to take your program to the next level.

Benefits of Optiv’s Optimization Service

1. Identify and Remediate Security Gaps: Know and fix your weaknesses prior to an incident.
2. Increase the Effectiveness of Your Team: Project documentation and knowledge transfer help create product authorities within your team.
3. Leverage Leading Practices: Gain the upper hand from industry best practices to harden your security posture.
4. Ability to Focus on Other Projects: Free your staff from trying to learn the ins and outs of specific products so they can focus on larger initiatives.

TECHNOLOGY RATIONALIZATION

Technology Rationalization service helps organizations gain a comprehensive understanding of their technical security control environment. Without diving into device configurations, the analysis identifies redundancies and program gaps to improve security coverage and effectiveness with new and existing products.

TECHNOLOGY SERVICES

Optiv offers a complete set of technology services designed to quickly get the most out of your security investment. Services include:

- QuickStart
- Implementation and Migration
- AfterCare
- Optimization
- Health Check
- Authorized Support

Secure your security.”

Optiv is a security solutions integrator – a “one-stop” trusted partner with a singular focus on cybersecurity. Our end-to-end cybersecurity capabilities span risk management and transformation, cyber digital transformation, threat management, cyber operations, identity and data management, and integration and innovation, helping organizations realize stronger, simpler and more cost-efficient cybersecurity programs that support business requirements and outcomes. At Optiv, we are leading a completely new approach to cybersecurity that enables clients to innovate their consumption models, integrate infrastructure and technology to maximize value, achieve measurable outcomes, and realize complete solutions and business alignment.
