Get the Expert Support Necessary to Advise on Your SASE Adoption

Back in the early 2000s, a company’s headquarters was everything. That’s where all the data lived and employees had to VPN into the network for access. This approach was already on the way out before COVID-19 put the final nail in the coffin.

The future is secure access service edge (SASE) and Optiv is ready to lead the way to this new approach. SASE brings an expert perspective to networking and security that enables companies to simplify their technology stack while driving towards their Zero Trust methodology.

SASE reduces the requirements to install and manage multiple point solutions through a converged technology stack to simplify your daily operations.

Optiv Solutions

Clients ready to adopt the SASE framework, or mature their SASE capabilities, will find numerous benefits in Optiv’s SASE Workshops.

SASE Workshops provide guidance from our subject matter experts around a range of topics to:

- Understand current pain-points, requirements, technology investments and architecture related to data security and corporate access
- Identify user and application communities requiring control and inspection
- Discuss on-prem versus cloud use-case considerations and related technologies
- Provide recommendations on next-step activities regarding design or technology validation

How We Do It - Workshop Phases

**Capability**
- Review current technology stack, strategy or methodology
- Identify pain points
- Discuss how people and processes are currently administered in the client’s current framework

**Vision**
- Understand current trends in the marketplace/modern networking and security strategies
- Identify what success looks like for the client
- Discuss how the SASE methodology can benefit the business beyond network and security

**Roadmap**
- Define KRI (Key Risk Indicators) for prototype/pilot activities
- Discuss how this phase of the workshop fits in an overall SASE strategy
- Record findings for architecture session
**OPTIV WORKSHOPS**

Optiv's SASE workshops provide all the information and guidance necessary to fully embrace this model.

---

**WHY CLIENTS CHOOSE OPTIV**

Partnering with Optiv on your SASE journey will help you achieve the following benefits:

- Integrate with your current processes, tools and systems
- Simplified network and security technology management
- Improved remote user experience
- Converged networking and security
- Improved security with zero trust
- Cloud scalability and flexibility

---

**THE OPTIV ADVANTAGE**

**Certified Professionals**

AWS – Professional, CISSP, CCSP, GIAC, CCSK, Google Cloud Professional, MCSE, Databricks, Elastic, Azure

**16+ Years**

The average experience of Optiv’s Cyber Digital Transformation team

**Emerging Technology Expertise**

Data Analytics, DevSecOps, Public/ Private/ Hybrid Cloud, Orchestration and Automation, Robotic Process Automation

**Inspired Thought Leaders**

Speaking engagements at leading industry conferences including, Microsoft Ignite, AWS: ReInvent, RSA Conference, Spark Summit and Black Hat

**Industry Expertise**

Healthcare, Finance, Manufacturing, Critical Infrastructure, Retail, Aerospace and Defense, Oil and Gas

---

**Secure greatness™**

Optiv Security is the cyber advisory and solutions leader, delivering strategic and technical expertise to more than 7,000 companies across every major industry. We partner with organizations to advise, deploy and operate complete cybersecurity programs from strategy and managed security services to risk, integration and technology solutions. With clients at the center of our unmatched ecosystem of people, products, partners and programs, we accelerate business progress like no other company can. At Optiv, we manage cyber risk so you can secure your full potential.
