Gain a bird’s eye view across your enterprise with SIEM for a modern world

Optiv can help improve your security posture with a Microsoft Threat Protection Workshop. Organizations are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Achieve your broader security objectives—and identify current and real threats—by scheduling a Microsoft Threat Protection Workshop.

We can help develop a strategic plan customized for your organization and based on the recommendations of Optiv and Microsoft cybersecurity experts. You’ll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to upgrade your security posture for the long-term.

Choose The Approach That’s Best for You

Every organization is different, so this workshop can be customized to fit your environment and goals. We can provide either of two scenarios:

**Remote monitoring**
If your organization doesn’t have its own security operations center (SOC) or if you want to offload some monitoring tasks, we will demonstrate how Optiv can perform remote monitoring and threat hunting for you.

**Joint threat exploration**
If your organization is interested in learning how to integrate Azure Sentinel in your existing SOC by replacing or augmenting an existing SIEM, we will work with your SecOps team and provide additional readiness to bring them up to speed.

“With everything running through Azure Sentinel, we’ve reduced the time spent on case management and resolution of alerts by approximately 50 percent”

—Stuart Gregg, Cyber Security Operations Lead, ASOS
Workshop Objectives

Through this workshop, we will work with you to:

• **Discover threats** to your Microsoft 365 cloud and on-premises environments across email identity and data.

• **Understand how to mitigate threats** by showing how Microsoft 365 and Azure security products can help mitigate and protect against threats that are found.

• **Plan next steps** and provide information to build a business case for a production deployment of Azure Sentinel including a technical deployment roadmap.

In addition, depending on the selected scenario, you will also:

**Experience the benefits of a managed SIEM** with a true cloud native SIEM, managed and monitored by our cybersecurity experts. (Remote Monitoring scenario)

**Receive hands-on experience**, learn how to discover and analyze threats using Azure Sentinel and how to automate your Security Operations to make it more effective. (Joint Threat Exploration scenario)

Who Should Attend

The workshop is intended for security decision-makers such as:

• CCO, CSO, CISO, CEO, CFO, CIO, or CTO.

• IT-Architect, Compliance Architect, Security Architect, Network Architect

• Compliance & Security Administrator

• Microsoft 365 Tenant Administrator

What We’ll Do

| Analyze your requirements and priorities for a SIEM deployment | Define scope & deploy Azure Sentinel in your production environment | Remote monitoring* and proactive threat hunting to discover attack indicators *optional component | Discover threats and demonstrate how to automate responses | Recommend next steps on how to proceed with a production implementation of Azure Sentinel |

Together for Stronger Security

**Optiv + Microsoft**

Optiv helps accelerate adoption to maximize your Microsoft investment. We secure your organization and reduce complexities by integrating built-in security solutions from Microsoft to manage and secure identities, protect your data, safeguard your cloud applications and stop threats. We have designed solutions specifically for Microsoft that are focused on business outcomes and creating clarity from cybersecurity complexity and chaos.
