Microsoft Hybrid Cloud Security Workshop

Get a customized threat and vulnerability analysis of your hybrid and multi-cloud environment and learn how to build a more robust cloud security system.

Improve your cloud security posture with an Optiv and Microsoft Hybrid Cloud Security Workshop.

As the use of cloud services continues to grow, cyber risks and threats continue to evolve. Achieve your hybrid and multi-cloud security objectives—and identify current and real threats—by scheduling a Microsoft Hybrid Cloud Security Workshop.

We can help you develop a strategic plan customized for your organization and based on the recommendations of Microsoft cybersecurity experts. You’ll gain visibility into immediate threats and vulnerabilities across Azure, on-premises and multi-cloud environments, plus clarity and support on how to improve your security posture for the long term.

Workshop Highlights

- Discover threats and vulnerabilities in your hybrid environment
- Learn how to prioritize and mitigate potential threats to your servers and services
- Understand what can be done to reduce the attack surface area for hybrid workloads
- Learn about benefits and capabilities of Azure Defender and Azure Network Security
- Develop defined next steps based on your needs and objectives

Why You Should Attend

Given the volume and complexity of identities, data, apps, endpoints, and infrastructure, it’s essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward.

By attending this workshop, you can:

- **Identify current, security threats and vulnerabilities in your hybrid and multi-cloud environment**
- **Document your security priorities and needs for the benefit of key stakeholders**
- **Walk away with actionable next steps based on your specific needs and objectives**
- **Better understand how to accelerate your security journey using the latest tools**

**Do you have a good understanding of security vulnerabilities in your hybrid and multi-cloud environment including VMs, databases, Azure storage and more?**

**Are you aware of the number of suspected authentication activities across your multi-cloud environment?**

**In short, are you confident about the cloud security posture of your organization?**
What to Expect
During this workshop, we’ll partner with you to strengthen your organization’s approach to hybrid cloud security.

We’ll help you better understand how to prioritize and mitigate potential attacks:

- **Analyze** your requirements and priorities for a hybrid cloud security detection and response solution.
- **Define Scope** & deploy Azure Defender in the production environment, onboarding servers and other selected services.
- **Explore** Azure Network Security capabilities and experience selected Azure Network Security products in a demonstration environment.
- **Discover** existing hybrid workload vulnerabilities and learn how to reduce the attack surface area.
- **Discover** threats to the included hybrid workloads and demonstrate how to investigate and respond to threats.
- **Recommend** next steps on proceeding with a production deployment of Azure Defender and Azure Network Security.

Who Should Attend
The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer
- Data Governance Officer
- IT Security, IT Compliance, and/or IT Operations
- Data Governance

Together for Stronger Security

**Optiv + Microsoft**
Optiv helps accelerate adoption to maximize your Microsoft investment. We secure your organization and reduce complexities by integrating built-in security solutions from Microsoft to manage and secure identities, protect your data, safeguard your cloud applications and stop threats. We have designed solutions specifically for Microsoft that are focused on business outcomes and creating clarity from cybersecurity complexity and chaos.
