Center for Board Relations and Education
Enhancing Executives’ Cyber Fluency

Today's volatile threat landscape requires executive leadership to keep a strong grasp on the organization's cybersecurity. As threat actors continue to grow in both number and sophistication, the C-Suite and board are increasingly looking for direction and guidance. But too often, executives lack the acumen needed to make effective strategic decisions.

Optiv Solutions
Optiv's Executive Board Advisory solution addresses the educational challenges faced by leadership. James Turgal, our liaison to public and private boards of directors, represents a wealth of insight into today's cybersecurity challenges. Industry trends, advisory boards, cyber expertise, advanced threats, geo-political cyber implications, impact-focused management – these specializations can improve the board’s understanding of the threats and operational demands facing the modern enterprise.

We scope our presentation based on the board’s desired areas of focus, tailoring the context of the conversation to the enterprise's specific goals, technologies, industry dynamics and culture. The Executive Board Advisory, which is reserved specifically for select clients, helps leadership digest the threats that stand between them and a resilient cyber strategy. With a more functional knowledge of the space, executive leadership can make more productive cybersecurity decisions and minimize organizational risk.

Benefits

We understand the challenges executives face in providing strategic oversight to an organization’s cybersecurity mission and we work to boost understanding of the intricate web of threats facing boards and leadership teams. Optiv’s Executive Board Advisory will support your organization through:

- Improved understanding of today’s cyber threats and their impacts
- Identification of top threats that face your organization
- Improved decision-making surrounding cyber strategy
- Early cybersecurity education at the board level
James Turgal

Mr. Turgal specializes in cyber risk, threats, strategy, incident response and board relations, providing subject matter expertise to C-Suite executives, audit committees and boards. He helps clients develop and execute cyber-focused strategy and security programs to prevent and minimize the business operations impact of cyber threats.

Turgal joined us from the cyber risk practice at Deloitte and a distinguished 22-year career with the Federal Bureau of Investigation (FBI). During his time at the FBI, he served as the Special Agent in Charge of the Phoenix office and the Assistant Director – Chief Human Capital Officer (CHCO), culminating his public service career as the Executive Assistant Director of Global Information Technology and the Chief Information Officer (CIO).
